

Get Relief

The human eye is not suited for viewing a computer screen for long hours. Problems occur because the text and images on your screen are comprised of tiny dots of light called "pixels." Unlike printed text and images, the edges of each pixel are blurred. Eye muscles become overworked and fatigued in their repeated attempts to focus on them. Other symptoms include headaches, tired or burning eyes, slow focusing, blurred vision at distance, neck pain, and shoulder pain.

HOYALUX TACT lenses

HOYALUX TACT is a lens designed specifically for computer users and people who perform visually intensive work or hobbies. Because it is uniquely designed for these special activities, it can significantly improve vision and reduce eye strain caused by CVS. It is the most advanced lens of its kind available today. HOYALUX TACT is optimized for indoor activities. It is designed to provide outstanding near and intermediate vision and can even help reduce headaches, neck pain, and shoulder pain. Most of all, HOYALUX TACT provides exceptional vision when you need it the most.

SUPER HiVISION Anti-Reflection

You can experience optimum vision benefits when you combine HOYALUX TACT with Super HiVision Anti-Reflection. Super HiVision reduces distracting reflections on your lenses caused by home or office lighting. This feature will enhance your visual comfort and further reduce eyestrain. All in all, Super HiVision makes you look better, see better, and even makes your lenses easy to clean.

Ask Your Eye Care Professional
